

Senate File 2094 - Introduced

SENATE FILE 2094

BY GRUENHAGEN

A BILL FOR

1 An Act relating to computer science and artificial intelligence
2 education, including high school curricula and graduation
3 requirements, practitioner preparation programs, and college
4 admissions, and including applicability provisions.
5 BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF IOWA:

1 Section 1. Section 256.7, subsection 26, paragraph a,
2 unnumbered paragraph 1, Code 2026, is amended to read as
3 follows:

4 Adopt a core curriculum and adopt rules that establish high
5 school graduation requirements for all students in school
6 districts and accredited nonpublic schools that include at a
7 minimum satisfactory completion of four years of English and
8 language arts, three years of mathematics, three years of
9 science, and three years of social studies, and, beginning with
10 students in the 2030-2031 school year graduating class, one
11 semester of computer science and artificial intelligence, or
12 the trimester or quarter equivalent, which may include computer
13 science instruction provided in grade eight pursuant to section
14 256.11, subsection 4.

15 Sec. 2. Section 256.7, subsection 26, paragraph a,
16 subparagraph (4), Code 2026, is amended to read as follows:

17 (4) The rules shall provide for the establishment of
18 high-quality standards for computer science and artificial
19 intelligence education taught by elementary, middle, and high
20 schools, in accordance with the goal established under section
21 284.6A, subsection 1, setting a foundation for personal and
22 professional success in a high-technology, knowledge-based Iowa
23 economy. The high-quality standards for computer science and
24 artificial intelligence education must require that all levels
25 and grades of computer science and artificial intelligence
26 instruction include instruction related to the fundamental
27 concepts of evolving computer science technologies and
28 artificial intelligence, including instruction that explains
29 what artificial intelligence is, how artificial intelligence
30 works, how to design artificial intelligence, how artificial
31 intelligence impacts society, and ethical considerations
32 related to the use of artificial intelligence.

33 Sec. 3. Section 256.9, subsection 61, Code 2026, is amended
34 to read as follows:

35 61. Develop and implement a statewide kindergarten through

1 grade twelve computer science and artificial intelligence
2 instruction plan ~~by July 1, 2022.~~

3 Sec. 4. Section 256.9, Code 2026, is amended by adding the
4 following new subsections:

5 NEW SUBSECTION. 80. On or before June 30, 2027, publish
6 on the department's internet site a list of computer science
7 and artificial intelligence courses that satisfy the rules
8 adopted by the state board pursuant to section 256.7,
9 subsection 32, paragraph "c", and that a school district
10 or accredited nonpublic school may use to implement the
11 graduation requirement described in section 256.11, subsection
12 5, paragraph "1", subparagraph (2). The list must include
13 the names of the computer science and artificial intelligence
14 courses and the course codes associated with each computer
15 science and artificial intelligence course.

16 NEW SUBSECTION. 81. Publish on the department's internet
17 site all of the information submitted to the department by
18 school districts pursuant to section 256.11, subsection 5,
19 paragraph "1", subparagraph (3).

20 NEW SUBSECTION. 82. On or before June 30, 2027, create
21 and publish on the department's internet site a plan to
22 expand statewide computer science and artificial intelligence
23 teacher capacity to support implementation of the graduation
24 requirement described in section 256.11, subsection 5,
25 paragraph "1", subparagraph (2). The plan must specifically
26 address targeted support for schools with a total enrollment of
27 less than five hundred students in grades nine through twelve.
28 When creating the plan, the department shall invite input from
29 representatives of kindergarten through grade twelve schools,
30 including students, computer science teacher professional
31 development providers, industries that employ technology
32 workers, and higher education institutions that offer computer
33 science teacher preparation pathways.

34 Sec. 5. Section 256.11, subsection 3, paragraph b, Code
35 2026, is amended to read as follows:

1 ~~b. Computer science and artificial intelligence instruction~~
2 ~~incorporating the standards established under section 256.7,~~
3 ~~subsection 26, paragraph "a", subparagraph (4), shall be~~
4 ~~offered in at least one grade level commencing with the school~~
5 ~~year beginning July 1, 2023.~~

6 Sec. 6. Section 256.11, subsection 4, paragraph b, Code
7 2026, is amended to read as follows:

8 ~~b. Computer science and artificial intelligence instruction~~
9 ~~incorporating the standards established under section 256.7,~~
10 ~~subsection 26, paragraph "a", subparagraph (4), shall be~~
11 ~~offered in at least one grade level commencing with the~~
12 ~~school year beginning July 1, 2023. Career exploration~~
13 ~~and development shall be designed so that students are~~
14 ~~appropriately prepared to create an individual career~~
15 ~~and academic plan pursuant to [section 279.61](#), incorporate~~
16 ~~foundational career and technical education concepts aligned~~
17 ~~with the six career and technical education service areas as~~
18 ~~defined in [subsection 5](#), paragraph "h", incorporate relevant~~
19 ~~twenty-first century skills to facilitate career readiness, and~~
20 ~~introduce students to career opportunities within the local~~
21 ~~community and across this state.~~

22 Sec. 7. Section 256.11, subsection 4, Code 2026, is amended
23 by adding the following new paragraph:

24 ~~NEW PARAGRAPH. *0c.* Career exploration and development~~
25 ~~shall be designed so that students are appropriately prepared~~
26 ~~to create an individual career and academic plan pursuant to~~
27 ~~section 279.61, incorporate foundational career and technical~~
28 ~~education concepts aligned with the six career and technical~~
29 ~~education service areas as defined in subsection 5, paragraph~~
30 ~~"h", incorporate relevant twenty-first century skills to~~
31 ~~facilitate career readiness, and introduce students to career~~
32 ~~opportunities within the local community and across this state.~~

33 Sec. 8. Section 256.11, subsection 5, paragraph a, Code
34 2026, is amended by adding the following new subparagraph:

35 ~~NEW SUBPARAGRAPH. (3) The five units of science may include~~

1 not more than one unit of instruction related to computer
2 science and artificial intelligence.

3 Sec. 9. Section 256.11, subsection 5, paragraphs e and l,
4 Code 2026, are amended to read as follows:

5 e. Two additional units of mathematics.

6 (1) The two additional units of mathematics may include
7 instruction related to applied sciences, technology,
8 engineering, or manufacturing, including transportation,
9 distribution, logistics, architecture, and construction, which
10 may be offered and taught through dedicated units of coursework
11 or through units of coursework that also meet the requirements
12 of the coursework required under paragraph "h", subparagraph
13 (1), subparagraph division (c). ~~The state board shall adopt~~
14 rules pursuant to ~~chapter 17A~~ to implement this paragraph.

15 (2) The two additional units of mathematics may include not
16 more than one unit of instruction related to computer science
17 and artificial intelligence.

18 (3) The state board shall adopt rules pursuant to chapter
19 17A to implement this paragraph.

20 1. (1) One-half unit of computer science commencing
21 with the school year beginning July 1, 2022 and artificial
22 intelligence. The one-half unit of computer science and
23 artificial intelligence shall incorporate the standards
24 established pursuant to ~~section 256.7, subsection 26~~, paragraph
25 "a", subparagraph (4), and may be offered online in accordance
26 with rules adopted pursuant to ~~section 256.7, subsection 32~~,
27 paragraph "a". The one-half unit of computer science and
28 artificial intelligence shall satisfy all of the following
29 requirements:

30 (a) Be of high quality.

31 (b) Meet or exceed the curriculum standards and
32 requirements established by the state board.

33 (c) Be offered and taught in a traditional classroom
34 setting; provided, however, that if a traditional classroom
35 setting is not feasible, the one-half unit of computer science

1 and artificial intelligence may be offered and taught in any
2 of the following ways:

3 (i) Through a combination of instruction that is delivered
4 in a traditional classroom setting and instruction that is
5 delivered primarily over the internet.

6 (ii) Through instruction that is delivered primarily over
7 the internet in accordance with rules adopted by the state
8 board pursuant to section 256.7, subsection 32, paragraph
9 "a", and is tailored to meet the needs of each participating
10 student.

11 (2) (a) All students, beginning with students in the
12 2030-2031 school year graduating class, shall complete one-half
13 unit of computer science and artificial intelligence as a
14 condition of graduation, which shall incorporate the standards
15 established pursuant to section 256.7, subsection 26, paragraph
16 "a", subparagraph (4), and which may include computer science
17 instruction provided in grade eight pursuant to section
18 256.11, subsection 4. The condition of graduation shall not
19 apply to a student who enrolls in a school district or an
20 accredited nonpublic school in grade twelve immediately after
21 being enrolled in a school located outside of this state that
22 does not impose a comparable computer science and artificial
23 intelligence instruction requirement.

24 (b) (i) On or before July 1, 2030, a school district or
25 accredited nonpublic school may apply to the department of
26 education for a one-time waiver of the implementation of the
27 condition of graduation described in this subparagraph. The
28 waiver shall be for a period not longer than one school year.

29 (ii) The state board shall adopt rules pursuant to chapter
30 17A establishing standards for the submission of applications
31 for waivers of the implementation of the condition of
32 graduation described in this subparagraph and the department's
33 consideration and approval of waivers. The rules must
34 require that the department of education may only approve an
35 application for a waiver submitted pursuant to subparagraph

1 subdivision (i) if the school district or accredited nonpublic
2 school applying for the waiver demonstrates to the department
3 that the school district or accredited nonpublic school made
4 a reasonable attempt to implement the condition of graduation
5 described in this subparagraph.

6 (iii) This subparagraph division is repealed July 1, 2031.

7 (3) Each school district shall report annually to the
8 department all of the following:

9 (a) The course names and course codes associated with all
10 computer science and artificial intelligence courses offered
11 and taught in the school district pursuant to this paragraph
12 and, to the extent such information is available, a description
13 of the format in which each course is offered and taught.

14 (b) The number of teachers employed by the school district
15 who teach computer science and artificial intelligence
16 instruction, sortable by the endorsements and authorizations
17 held by each teacher and the highest academic degree attained
18 by each teacher. The report shall not include any personally
19 identifiable information related to the teachers employed by
20 the school district who teach computer science and artificial
21 intelligence instruction.

22 (c) The number of students enrolled in a computer science
23 and artificial intelligence course offered and taught by the
24 school district pursuant to this paragraph, sortable by the
25 grade level of each student. The report shall not include any
26 personally identifiable information related to the students
27 enrolled in a computer science and artificial intelligence
28 course offered and taught by the school district.

29 Sec. 10. Section 256.11, subsection 5, paragraph h, Code
30 2026, is amended by adding the following new subparagraph:

31 NEW SUBPARAGRAPH. (04) Units of instruction provided
32 under subparagraph (1), subparagraph division (b) or (c), may
33 include up to one unit of instruction related to computer
34 science and artificial intelligence, if the teacher providing
35 such instruction has either an initial career and technical

1 education authorization issued by the board of educational
2 examiners or a career and technical education authorization
3 issued by the board of educational examiners.

4 Sec. 11. Section 256.11, subsection 17, paragraph a,
5 subparagraph (2), Code 2026, is amended to read as follows:

6 (2) If a school district or accredited nonpublic school
7 meets the requirements of subparagraph (1), subparagraph
8 division (a) or (b), the school district or accredited
9 nonpublic school may exceed the two-subject limitation
10 specified in subparagraph (1), unnumbered paragraph 1, for the
11 purpose of providing world language, personal finance literacy,
12 and computer science and artificial intelligence coursework
13 online in accordance with paragraph "c".

14 Sec. 12. Section 256.13, Code 2026, is amended to read as
15 follows:

16 **256.13 Nonresident pupils.**

17 The boards of directors of two or more school districts may
18 by agreement provide for attendance of pupils residing in one
19 district in the schools of another district for the purpose of
20 taking courses not offered in the district of their residence,
21 including computer science and artificial intelligence courses
22 described in section 256.11, subsection 5, paragraph "1". The
23 boards may also provide by agreement that the districts will
24 combine their enrollments for one or more grades. Courses
25 and grades made available to students in this manner shall be
26 considered as complying with any standards or laws requiring
27 the offering of such courses and grades. The boards of
28 directors of districts entering into such agreements may
29 provide for sharing the costs and expenses of the courses. If
30 the agreement provides for whole grade sharing, the costs and
31 expenses shall be paid as provided in sections 282.10 through
32 282.12.

33 Sec. 13. Section 256.16, subsection 1, Code 2026, is amended
34 by adding the following new paragraph:

35 NEW PARAGRAPH. *p.* Include preparation in computer science,

1 artificial intelligence, and computational thinking that is
2 appropriate to the grade level and subject area in which
3 the student who is enrolled in the practitioner preparation
4 program will teach. A higher education institution providing
5 practitioner preparation may satisfy this requirement by
6 requiring a student who is enrolled in the practitioner
7 preparation program to complete a dedicated course or
8 module, or by integrating such preparation into the existing
9 practitioner preparation program.

10 Sec. 14. Section 256.146, subsection 19, Code 2026, is
11 amended to read as follows:

12 19. Adopt rules pursuant to [chapter 17A](#) establishing
13 endorsements and authorizations for computer science and
14 artificial intelligence instruction, including. The rules
15 shall include traditional and nontraditional pathways for
16 obtaining such endorsements or authorizations, including
17 through instruction that is delivered primarily over the
18 internet that may be used to demonstrate competence in computer
19 science and artificial intelligence instruction for teachers
20 under an initial or conditional license.

21 Sec. 15. Section 262.9, subsection 3, Code 2026, is amended
22 to read as follows:

23 3. a. Make rules for admission to and for the government of
24 ~~said~~ the institutions of higher learning, not inconsistent with
25 law.

26 b. The rules described in paragraph "a" must require that,
27 if an applicant for admission to an institution of higher
28 learning uses a computer science and artificial intelligence
29 course to fulfill any requirements related to units of science
30 instruction under section 256.11, subsection 5, paragraph "a",
31 subparagraph (3), or any requirements related to units of
32 mathematics instruction under section 256.11, subsection 5,
33 paragraph "e", subparagraph (2), then the institution of higher
34 learning must accept the unit or units of instruction related
35 to computer science and artificial intelligence as equivalent

1 to the corresponding science or mathematics unit of instruction
2 for purposes of the calculation of the regent admission index.

3 Sec. 16. Section 262.9, Code 2026, is amended by adding the
4 following new subsection:

5 NEW SUBSECTION. 43. Develop, in consultation with the
6 institutions of higher education governed by the board,
7 guidance related to how a higher education institution
8 providing practitioner preparation can best incorporate
9 preparation related to computer science, artificial
10 intelligence, and computational thinking into the approved
11 practitioner preparation program, as required under section
12 256.16, subsection 1, paragraph "p", and distribute such
13 guidance to each higher education institution providing
14 practitioner preparation.

15 Sec. 17. Section 280.3, subsection 3, Code 2026, is amended
16 to read as follows:

17 3. The board of directors of each public school district
18 and the authorities in charge of each nonpublic school shall
19 develop and implement a kindergarten through grade twelve
20 computer science and artificial intelligence plan ~~by July 1,~~
21 ~~2022, which~~ that incorporates the standards established under
22 section 256.7, subsection 26, paragraph "a", subparagraph (4),
23 and the minimum educational standards relating to computer
24 science and artificial intelligence contained in section
25 256.11.

26 Sec. 18. Section 284.6A, subsection 1, paragraphs a and b,
27 Code 2026, are amended to read as follows:

28 a. That instruction in high-quality computer science and
29 artificial intelligence for elementary, middle school, and
30 high school students establishes a foundation for personal and
31 professional success in a high-technology, knowledge-based Iowa
32 economy.

33 b. It is the goal of the general assembly that ~~by July~~
34 ~~1, 2019,~~ each accredited high school offer at least one
35 high-quality computer science and artificial intelligence

1 course, each accredited middle school offer instruction in
2 exploratory computer science and artificial intelligence, and
3 each accredited elementary school offer instruction in the
4 basics of computer science and artificial intelligence.

5 Sec. 19. Section 284.6A, subsection 1, Code 2026, is amended
6 by adding the following new paragraph:

7 NEW PARAGRAPH. *0c.* In order to provide students with the
8 competencies to compete in a twenty-first century workforce,
9 develop skills that translate into high-wage jobs, develop
10 problem solving and critical thinking skills, and encourage
11 the creation and retention of new, high-wage jobs in this
12 state, all high school students enrolled in school districts
13 or accredited nonpublic schools, beginning with the 2030-2031
14 school year graduating class, students should complete one
15 semester of computer science and artificial intelligence
16 as a condition of graduation as required by section 256.7,
17 subsection 26, paragraph "a".

18 Sec. 20. Section 284.6A, subsection 2, paragraphs a and b,
19 Code 2026, are amended to read as follows:

20 *a.* A school district or accredited nonpublic school, or
21 a collaborative of one or more school districts, accredited
22 nonpublic schools, and area education agencies, may apply to
23 the department, in the manner prescribed by the department, to
24 receive moneys from the fund to provide proven professional
25 development activities for Iowa teachers in the area of
26 computer science and artificial intelligence education.

27 *b.* A school district or accredited nonpublic school may
28 apply to the department, in the manner prescribed by the
29 department, to receive moneys from the fund to provide tuition
30 reimbursement for Iowa teachers, including Iowa teachers under
31 an initial or conditional license, seeking endorsements or
32 authorizations for computer science and artificial intelligence
33 under section 256.146, subsection 19.

34 Sec. 21. STATE MANDATE FUNDING SPECIFIED. In accordance
35 with section 25B.2, subsection 3, the state cost of requiring

1 compliance with any state mandate included in this Act shall
2 be paid by a school district from state school foundation aid
3 received by the school district under section 257.16, and from
4 any grants received under the computer science professional
5 development fund established pursuant to section 284.6A. This
6 specification of the payment of the state cost shall be deemed
7 to meet all of the state funding-related requirements of
8 section 25B.2, subsection 3, and no additional state funding
9 shall be necessary for the full implementation of this Act
10 by and enforcement of this Act against all affected school
11 districts.

12 Sec. 22. APPLICABILITY. The following applies to students
13 admitted to an approved practitioner preparation program on or
14 after July 1, 2028:

15 The section of this Act amending section 256.16.

16 EXPLANATION

17 The inclusion of this explanation does not constitute agreement with
18 the explanation's substance by the members of the general assembly.

19 This bill relates to computer science and artificial
20 intelligence education, including high school curricula and
21 graduation requirements, practitioner preparation programs, and
22 college admissions.

23 Current law provides that the graduation requirements
24 applicable to students enrolled in school districts and
25 accredited nonpublic schools shall include, at a minimum,
26 satisfactory completion of four years of English and language
27 arts, three years of mathematics, three years of science,
28 and three years of social studies. The bill provides that
29 such graduation requirements shall also include, beginning
30 with students in the 2030-2031 school year graduating class,
31 satisfactory completion of one semester of computer science
32 and artificial intelligence, or the trimester or quarter
33 equivalent, which may include computer science and artificial
34 intelligence instruction provided in grade eight. Current law
35 also requires that the graduation requirements provide for the

1 establishment of high-quality standards for computer science
2 education taught by elementary, middle, and high schools. The
3 bill provides that these standards must require that all levels
4 and grades of computer science and artificial intelligence
5 instruction include instruction related to the fundamental
6 concepts of evolving computer science technologies and
7 artificial intelligence, including instruction that explains
8 what artificial intelligence is, how artificial intelligence
9 works, how to design artificial intelligence, how artificial
10 intelligence impacts society, and ethical considerations
11 related to the use of artificial intelligence.

12 The bill provides that the condition of graduation shall
13 not apply to a student who enrolls in a school district or
14 an accredited nonpublic school in grade 12 immediately after
15 being enrolled in a school located outside of this state that
16 does not impose a comparable computer science and artificial
17 intelligence instruction requirement. The bill authorizes
18 school districts and accredited nonpublic schools to apply
19 to DE for a one-time waiver of the implementation of the
20 graduation requirement. The bill requires the state board
21 of education to adopt rules establishing standards for the
22 submission of applications for waivers of the implementation of
23 the condition of graduation and the department of education's
24 (DE) consideration and approval of waivers.

25 The bill requires the director of DE to publish on DE's
26 internet site, on or before June 30, 2027, a list of computer
27 science and artificial intelligence courses that satisfy the
28 rules adopted by the state board and that a school district or
29 accredited nonpublic school may use to implement the graduation
30 requirement. Additionally, the director is required to create
31 and publish on DE's internet site, on or before June 30, 2027,
32 a plan to expand statewide computer science and artificial
33 intelligence teacher capacity to support implementation of the
34 graduation requirement. The plan must specifically address
35 targeted support for schools with a total enrollment of less

1 than 500 students in grades 9 through 12.

2 Current law requires school districts and accredited
3 nonpublic schools to offer and teach to students enrolled in
4 grades 9 through 12 five units of science and two additional
5 units of mathematics. The bill provides that the five units
6 of science may include not more than one unit of instruction
7 related to computer science and artificial intelligence, and
8 the two additional units of mathematics may include not more
9 than one unit of instruction related to computer science and
10 artificial intelligence.

11 Current law requires school districts and accredited
12 nonpublic schools to offer and teach to students enrolled in
13 grades 9 through 12 one-half unit of computer science. The
14 bill modifies provisions related to how the computer science
15 and artificial intelligence instruction is offered and taught
16 by allowing the instruction to be offered and taught through
17 blended learning, or through instruction that is delivered
18 primarily over the internet, when it is not possible to provide
19 such instruction in a traditional classroom setting. Current
20 law allows school districts to, by agreement, provide for
21 attendance of pupils residing in one district in the schools
22 of another district for the purpose of taking courses not
23 offered in the district of their residence. The bill provides
24 that such courses may include computer science and artificial
25 intelligence courses.

26 The bill modifies provisions related to the career and
27 technical education instruction provided to students enrolled
28 in grades 9 through 12 to provide that instruction provided
29 under either the arts, communications, and information systems
30 or applied sciences, technology, engineering, and manufacturing
31 service areas may include up to one unit of instruction
32 related to computer science and artificial intelligence, if the
33 teacher has either an initial career and technical education
34 authorization or a career and technical education authorization
35 issued by the BOEE.

1 The bill requires school districts to report annually to
2 DE specified information related to computer science and
3 artificial intelligence courses offered and taught in the
4 school district, teachers providing computer science and
5 artificial intelligence instruction, and students involved
6 in computer science and artificial intelligence courses.
7 DE is required to publish on DE's internet site all of the
8 information submitted by school districts pursuant to these
9 provisions.

10 The bill requires each higher education institution
11 providing practitioner preparation to include preparation in
12 computer science, artificial intelligence, and computational
13 thinking that is appropriate to the grade level and subject
14 area in which the student who is enrolled in the practitioner
15 preparation program will teach. This requirement applies to
16 students admitted to an approved practitioner preparation
17 program on or after July 1, 2028. The bill requires the
18 state board of regents, in consultation with the institutions
19 of higher education governed by the state board of regents,
20 to develop guidance related to how a higher education
21 institution providing practitioner preparation can best
22 incorporate preparation related to computer science, artificial
23 intelligence, and computational thinking into the approved
24 practitioner preparation program, as required under the bill's
25 provisions.

26 The bill requires that the rules adopted by the BOEE
27 establishing nontraditional pathways for obtaining endorsements
28 and authorizations for computer science and artificial
29 intelligence instruction also include opportunities to obtain
30 such endorsements or authorizations through instruction that
31 is delivered primarily over the internet that may be used to
32 demonstrate competence in computer science and artificial
33 intelligence instruction for teachers under an initial or
34 conditional license.

35 Current Code section 262.9(3) authorizes the state board

1 of regents to make rules for admission to the institutions
2 of higher education governed by the state board of regents.
3 Pursuant to this provision, the state board of regents has
4 adopted the regent admission index, which is a formula used to
5 assess high school applicants that combines standardized test
6 scores, grade point average, and core high school courses into
7 a single score. If a student's regent admission index score
8 is high enough, the student is guaranteed automatic admission
9 to an institution of higher education governed by the state
10 board of regents. The bill provides that the rules adopted
11 by the state board of regents related to the regent admission
12 index must require that if an applicant for admission uses a
13 computer science and artificial intelligence course to fulfill
14 any requirements related to units of science or mathematics
15 instruction, then the institution of higher education governed
16 by the state board of regents must accept the unit or units
17 of instruction related to computer science and artificial
18 intelligence as equivalent to the corresponding science or
19 mathematics unit of instruction for purposes of the calculation
20 of the regent admission index.

21 Current law establishes a computer science professional
22 development incentive fund in the state treasury under the
23 control of DE. Current law authorizes DE to disburse moneys
24 contained in the fund to a school district or accredited
25 nonpublic school to provide tuition reimbursement for Iowa
26 teachers seeking endorsements or authorizations for computer
27 science and artificial intelligence from the BOEE. The bill
28 modifies this provision to allow such tuition reimbursement to
29 be provided to Iowa teachers under an initial or conditional
30 license.

31 The bill may include a state mandate as defined in Code
32 section 25B.3. The bill requires that the state cost of
33 any state mandate included in the bill be paid by a school
34 district from state school foundation aid received by the
35 school district under Code section 257.16, and from any grants

1 received under the computer science professional development
2 fund. The specification is deemed to constitute state
3 compliance with any state mandate funding-related requirements
4 of Code section 25B.2. The inclusion of this specification is
5 intended to reinstate the requirement of political subdivisions
6 to comply with any state mandates included in the bill.
7 The bill makes conforming changes.
